

8th INTERNATIONAL CONFERENCE ON PAEDIATRIC CONTINUOUS RENAL REPLACEMENT THERAPY (pCRRT)

16th - 18th July 2015

Queen Elizabeth II Conference Centre, London, UK

Abstract Deadline: 15th April 2015

INVITATION

London is an inspirational place to hold a summer conference.

We would like to invite all professionals involved in paediatric Continuous Renal Replacement Therapy to take advantage of a programme involving an international panel of opinion leaders who will lead discussions on the latest developments in our speciality.

Importantly the programme will also include delegates' contribution to this conference and we

encourage the submission of free papers so we can all share the latest experience of delegates world wide.

The conference will benefit specialist nurses, physicians, pharmacists and industry who will be able to apply the knowledge gained from attending to improve the outcomes for those children who develop, or at risk of renal injury and failure.

Please make a note of the dates, sign up for updates on the conference and plan your abstracts.

We look forward to welcoming you to London.

COURSE DIRECTORS

Akash Deep

King's College Hospital,
London, UK
akash.deep@nhs.net

Timothy Bunchman

Childrens' Hospital of Richmond,
Virginia USA,
tbunchman@mcvh-vcu.edu

ORGANISING COMMITTEE

Medical Members:

Pam D'Silva, UK
Quen Mok, UK
Prabh Nayak, UK
Vesna Stojanovic, Serbia
Claire Westrope, UK

Specialist Nursing Members:

Kathryn Brennan, UK
Margaret Farley, UK
Molly McLaughlin, UK
Susan Taylor, UK

INTERNATIONAL SPEAKER FACULTY

Georg Auzinger, London, UK
Joseph Brierley, London, UK
Patrick Brophy, Iowa, USA
Timothy Bunchman, Virginia, USA
Joseph Carcillo, Pittsburgh, USA
Michael Champion, London, UK
Akash Deep, London, UK
Anil Dhawan, London, UK
Andrew Durward, London, UK
Margaret Farley, London, UK
Maria Ferris, North Carolina, USA
Daljit Hoti, London, UK
Heather Lambert, Newcastle, UK
Duncan Macrae, London, UK
Norma Maxvold, Virginia, USA

Mignon McCulloch, Cape Town,
South Africa
Quen Mok, London, UK
Prabh Nayak, Birmingham, UK
Marie O'Meara, London, UK
Stefano Picca, Rome, Italy
Rupesh Raina, Cleveland, USA
Sidharth Sethi, Delhi, India
Roy Sherwood, London, UK
Jordon Symons, Seattle, USA
Susan Taylor, London, UK
Julia Wendon, London, UK
Claire Westrope, Leicester, UK
Michael Zappitelli, Montreal,
Canada

CALL FOR ABSTRACTS

The 8th International Conference on pCRRT is offering prizes for the best poster and best oral presentations that demonstrate the most valuable contribution to paediatric patient care in the PIC Units with focus on AKI and pCRRT. Submission deadline 15th April 2015

Please refer to the conference website for details.

PROGRAMME FEATURES

The three day Programme will offer significant access to advancing knowledge in this speciality within paediatric intensive care. The programme will be delivered using:

- Workshop and Masterclass Sessions
- Simulation sessions
- Challenging Cases
- Debates
- Free Paper and Poster Sessions
- Keynote presentations

“The Programme is designed to benefit specialist nurses, physicians, pharmacists and industry who will be able to apply the knowledge gained to improve the outcomes for those children who develop, or at risk of renal injury and failure.”

King's College Hospital Pre-conference Workshop

'Problem solving in pCRRT: an interactive and hands on workshop.'

Thursday, 16th July 2015 at King's College Hospital, London

A specialist panel will deliver a comprehensive review of pCRRT with emphasis on the 'problems' and troubleshooting using simulators.

This short interactive course will focus on:

- Machine set up, alarms, trouble shooting and blood priming
- Citrate anticoagulation: set up and management
- Plasmapheresis: set up and prescription
- Peritoneal Dialysis: set up, prescription and complications
- Practical interactive sessions with case histories using simulators
- CRRT in cardiac bypass and ECMO: modality selection, circuit modifications, therapy dosing and monitoring

Faculty for the King's Workshop

- Stacey Bedford, London, UK
- Timothy Bunchman, Virginia, USA
- Patrick Brophy, Iowa, USA
- Pam D'Silva, London UK
- Margaret Farley, London, UK
- Norma Maxvold, Virginia, USA
- Mignon McCulloch, Cape Town, S Africa
- Molly McLaughlin, Nottingham, UK
- Kerry Murphy, London, UK
- Prabh Nayak, Birmingham, UK
- Vesna Stojavonic, Novi Sad, Serbia
- Sue Taylor, London, UK
- Claire Westrope, Leicester, UK

The course is advanced and relevant to both specialist nurses and clinicians.

For further information please visit the conference website.

PROGRAMME HIGHLIGHTS

Friday, 17th to
Saturday, 18th July 2015
Full Programme featuring:

Keynote Lecture: Acute Kidney Injury and CRRT: progress over the last 2 decades

Basics of CRRT Including Machines, Prescriptions, Filters, Blood Priming and Anticoagulation

- Common Terminology Used and Physiology in CRRT
- Machines and Membranes
- Vascular Access
- Anticoagulation Protocols
- Common Prescription Errors

Fluids in Critical Care and Septic Shock

- Debate: Aggressive Fluid Resuscitation in Septic Shock Increases Mortality
- When Fluids Go Wrong: CRRT in fluid overload
- Septic Shock Associated AKI
- Haemofiltration for Sepsis: burial or resurrection?
- High Chloride Containing Fluids Are a Problem
- Interesting Case of Septic Shock with Prescription

Specific CRRT Modalities with Prescription

- Peritoneal Dialysis
- Sustained Low Efficiency Dialysis
- Single Pass Albumin Dialysis / Molecular Adsorbent Recirculating System
- Plasmapheresis
- Haemodialysis
- Discontinuation of CRRT and/or Transition to Other Dialytic Modalities

CRRT in Specific Conditions: liver disease, neonates, intoxications, post cardio-pulmonary bypass and others

- CRRT in Post Cardiac Bypass and ECMO
- CRRT in Liver Disease
- CRRT in Intoxications
- Starting and Stopping CRRT in AKI
- Technical Challenges and Solutions in CRRT in Neonates; CARPIDIUM and NIDUS

AKI and CRRT (Miscellaneous)

- Drug Induced AKI in Critical Care
- How Do I Assess and Manage Patients in the ICU with Oliguria?
- Sedation and the Kidney: should we be cautious?
- Intra-abdominal Hypertension: emerging concept in AKI
- Measuring Glomerular Filtration Rate (GFR) in ICU
- Debate: Dose of CRRT Influences Outcome

Acute Kidney Injury (AKI)

- AKI in Critical Care: epidemiology and definitions
- Biomarkers to Define AKI
- Major Clinical Trials in AKI: interpretation for an intensivist
- How Do I Assess Patients with High Risk of AKI in PICU?
- How Should We Quantify the Effect of AKI on CKD?
- AKI in Neonates
- Hepatorenal Syndrome

AKI and CRRT Combined

- Panel discussion: Inborn Errors of Metabolism; perspectives from a Biochemist, Metabolic Physician, a Paediatric Intensivist and a Nephrologist and Role of Hepatocytes
- What is the Best Way To Dialyze a Post-operative Patient?
- Debate: Dialysis is The Best Modality in CRRT

Plus

- Pharmacology in a Critically Ill Child on CRRT
- Nutritional Implications in Children on CRRT
- Haemodialysis Versus CRRT in Critical Care
- Does CRRT Improve Renal Recovery and Outcomes?

Quality and Safety in CRRT

- CRRT in the Developed World
- CRRT in the Developing World
- Nursing Challenges
- Quality Matrix for AKI and CRRT

WELCOME TO LONDON FOR DELEGATES AND ACCOMPANYING PERSONS:

London is easy to get to with 5 international airports including one in the city centre. London offers direct flights connecting all parts of the world plus a high speed Eurostar train for those in Europe. London is served by a wealth of airlines including budget airlines so by booking flights early London is economical.

As a place to visit, the Queen Elizabeth II Conference Centre is in the heart of London next to a UNESCO World Heritage of Palace of Westminster. There are many sites of interest including free museums and art galleries, plus there is the 'West End' with a wealth of entertainment for all tastes.

Getting around London is easy where walking will get you to most areas. To visit other areas in London you can use the Underground, the famous red buses and black taxis. There are many tours too on foot or buses and some are free too.

London is well connected to other famous sites in England such as Stonehenge, the Cities of Bath, Oxford or Cambridge. For the children there is Lego land and Thorpe Park for a great day out.

Set off from London St Pancras International and arrive in Paris Gare Du Nord station in just over 2 hours via high-speed train with Eurostar.

The Conference Organisers have secured block bookings in hotels in walking distance of the conference venue. The website offers plenty of advice and options for accommodation.

To register your interest and for further information visit:
